

Home Performance Assessment Homeowner Preparation Guide

Please review and complete these items before the start of your Assessment. Call with questions.

- On colder days set thermostat to 70 degrees at least 3 hours before your assessment.
- Clean out ashes from fireplace, woodstove, or other wood burning appliances. Do not use for 24 hours before your assessment.
- Remove items that block access to your crawlspace, attic, basement, and garage storage.
 - Have previous 12-24 months of utility bills available.
 - Complete utility program disclosure documents.
- We kindly ask that you move pets to a closed room during the assessment. This avoids interaction with sensitive testing equipment.
 - Submit payment to 4 Peaks.
- We welcome you to join the assessment and learn how your house is performing as we conduct our testing and verification.
